
**MONROE COMMUNITY PROFILE
2001 UPDATE**

**APPENDIX I: DATA TABLES
SEPTEMBER, 2001**

Introduction

The tables that follow represent the second update of the tables that appear in the 1999 Community Profile. This appendix will continue to be updated on an annual basis until the next full community profile is released in the next year or two. Included in this update is an index to the measures used, listing where each measure appears (1) in the full text of the 1999 Community Profile, (2) in the 1999 profile's appendix, (3) in the separate geographic tables document (where geographic-specific data are available), (4) in the 2000 update, and (5) in this 2001 update. Also included is a summary Population Profile, including available 2000 Census data for Monroe County.

In this 2001 update of the basic Community Profile data tables, in most cases, at least one year of data has been added to the tables. In some cases two years of data have been added, while in a few cases no updated information was available at the time of the update. Updated information for those few measures will be included in the next data update. The data in this document were collected at the same level of geographic specificity as appeared in the 1999 Profile. For example, data that were available only at the county level for that profile were still available only at that level for this update.

MONROE COUNTY POPULATION PROFILE

Population

	1990 Census	2000 Census
Monroe County	713,968	735,343
Rochester	230,356	219,773
Suburbs	483,612	515,570

Population by Race/Ethnicity : Monroe County

White	600,328	581,961
Black	85,041	101,078
American Indian/Alaskan Native	2,020	1,950
Asian/Pacific Islander	12,667	NA
Other Race	13,912	NA
Asian	NA	17,922
Native Hawaiian, Other Pacific Islander	NA	220
Other	NA	17,925
Two+ races*	NA	14,287

*In 2000, Census respondents were able for the first time to select more than one race. This renders 1990 and 2000 data not directly comparable.

Persons of Hispanic Origin:

Mexican	1,367	2,285
Puerto Rican	19,229	27,501
Cuban	1,051	1,893
Other Hispanic	4,803	7,386
Total	26,450	39,065

Per Capita Income (1990 Census Data, 2000 Data not yet available):

Monroe County

Per Capita Income Overall	\$16,162
Per Capita Income by Race:	
White	17,433
Black	9,177
American Indian/Eskimo	12,634
Asian/Pacific Islander	13,171
Other	6,315
Persons of Hispanic Origin	7,696

Poverty (1990 Census Data, 2000 Data not yet available):**Monroe County**

Income in 1989 below poverty level: 71,734 (10.4% of the county population)

Poverty Estimates in Subsequent Years: Monroe County

1993 Estimate: 84,864 (11.8%)

1995 Estimate: 85,597 (12.0%)

Educational Attainment (1990 Census Data, 2000 Data not yet available):**Monroe County**

Persons 25 and older:

Less than 9 th grade	30,487 (6.7%)
9 th to 12 th grade, no diploma	60,797 (13.3%)
High school graduate, including equivalency	128,252 (28.0%)
Some college, no degree	75,934 (16.6%)
Associate's degree	42,146 (9.2%)
Bachelor's degree	74,493 (16.3%)
Graduate or professional degree	45,810 (10.0%)

- *Preliminary – data is as of September 2000
- These data completely replace those provided in original Profile and subsequent Update; MCDOH has provided annual rates as opposed to three-year rolling averages; found these to be more consistently available from NYSDOH and comparable to state and national data.
- Rates likely to change in the next profile as updated population estimates will become available.

Source: New York State Education Department

- New test administered for the first time in January 1999; replaces the Grade 3 Reading test.
- At Level 1, test scores indicate the student has serious academic deficiencies. At Level 2, test scores indicate the student will need extra help to meet the standards and pass the Regents examination. At Level 3, test scores indicate student performance at least meets the standards and, with continued steady growth, the student should pass the Regents examination. At Level 4, test scores indicate student performance exceeds the standards and the student is moving toward high performance on the Regents examination.

Source: New York State Education Department

- New test administered for the first time in January 1999; replaces the Grade 3 Math test.
- At Level 1, test scores indicate the student has serious academic deficiencies. At Level 2, test scores indicate the student will need extra help to meet the standards and pass the Regents examination. At Level 3, test scores indicate student performance at least meets the standards and, with continued steady growth, the student should pass the Regents examination. At Level 4, test scores indicate student performance exceeds the standards and the student is moving toward high performance on the Regents examination.

* Projections based on partial reporting

Source: New York State Office of Children and Family Services

- 1997 figures for Low Income differ from the data provided earlier due to retroactive claims, corrections in coding errors, etc.
- In 1999 NYS informed us that as of 1997 Public Assistance data is being tracked differently. CAP children are now being counted as part of the TANF block grant.
- Partial reporting in 1998 and 1999 due to changes in the claiming system may explain the jump in 2000 numbers.
- Presentation of data table reorganized for 2001 Update

Rochester		
	Percent	Number
1990	4.6	2,413
1991	4.4	2,304
1992	5.7	3,011

- New test administered for the first time in January 1999; replaces the Grade 6 Math test.
- At Level 1, test scores indicate the student has serious academic deficiencies. At Level 2, test scores indicate the student will need extra help to meet the standards and pass the Regents examination. At Level 3, test scores indicate student performance at least meets the standards and, with continued steady growth, the student should pass the Regents examination. At Level 4, test scores indicate student performance exceeds the standards and the student is moving toward high performance on the Regents examination.

- *Totals for 1998 and 1999 are incomplete due to lag in case reporting and confirmation.
- Given the incubation period between HIV and AIDS, many if not all people became infected in their teens. Since 1986 there have been a total of 230 cases of AIDS diagnosed among 20-29 year old county residents. In addition, 4 adolescents aged 13-19 have been diagnosed with AIDS. Includes inmate data.
- Bolded 1993 data changed in 2001 Update by MCDOH.
- Rates likely to change in the next profile as updated population estimates become available.
