

ALASKA

DECEMBER 2007

Adam P. Romero, *Public Policy Fellow*
Amanda K. Baumle, *Public Policy Fellow*
M.V. Lee Badgett, *Research Director*
Gary J. Gates, *Senior Policy Fellow*

Using data from the U.S. Census Bureau, this report provides demographic and economic information about same-sex couples and same-sex couples raising children in Alaska. We compare same-sex “unmarried partners,” which the Census Bureau defines as an unmarried couple who “shares living quarters and has a close personal relationship,” to different-sex married couples in Alaska.¹

In many ways, the more than 1,600 same-sex couples living in Alaska are similar to married couples. According to Census 2000, they live throughout the State, are racially and ethnically diverse, have partners that depend upon one another financially, and actively participate in Alaska’s economy. Census data also show that more than 44% of same-sex couples in Alaska are raising children. However, same-sex couples, including those with children, have fewer economic resources to provide for their families than do their married counterparts: they have lower household incomes and lower rates of home ownership.

Same-sex couple households
per 1,000 households

SAME-SEX COUPLES AND THE LGBT POPULATION IN ALASKA

- In 2000, there were 1,180 same-sex couples living in Alaska.²
- The number of same-sex couples increased to 1,644 by 2005.³ This increase likely reflects same-sex couples’ growing willingness to disclose their partnerships on government surveys.
- In 2005, there were almost 19,000 gay, lesbian, and bisexual people (single and coupled) living in Alaska.⁴

INDIVIDUALS IN SAME-SEX COUPLES ARE DEMOGRAPHICALLY AND GEOGRAPHICALLY DIVERSE

- There are more female same-sex couples (59%) than male same-sex couples (41%) in Alaska.⁵
- Individuals in same-sex couples are, on average, 37 years old, and significantly younger than individuals in married couples (44 years old) in Alaska.

- Same-sex couples live in every part of Alaska and constitute 0.9% of coupled households and 0.5% of all households in the state. Anchorage reported the most same-sex couples with 533 couples (0.6% of all households in the municipality), followed by Fairbanks North Star with 151 couples (0.5% of all households in the borough), and Matanuska-Susitna with 85 couples (0.4% of all households in the borough). The geographic areas with the highest percentage of same-sex couples are Denali (0.9% of all households in the borough) and Bethel (0.8% of all households in the area).⁶
- Alaska’s same-sex couples are more racially and ethnically diverse than their married counterparts: 34% of same-sex couples are nonwhite, compared to 22% of married couples.

PEOPLE IN SAME-SEX COUPLES ARE ACTIVELY ENGAGED IN THE STATE ECONOMY

- Individuals in same-sex couples in Alaska are more likely to be employed than are married individuals: 71% of individuals in same-sex couples are employed, compared to 66% of married individuals.

- Contrary to a popular stereotype, the annual earnings of men in same-sex couples are significantly lower than married men. On average, men in same-sex couples in Alaska earn \$31,168 each year, significantly less than \$47,164 for married men. The median income of men in same-sex couples in Alaska is \$27,200, or 32% less than that of married men (\$40,000).
- Women in same-sex couples in Alaska earn an average of \$32,809 per year (with a median of \$30,000), more than married women, whose earnings average \$26,051 (with a median of \$23,900). Women in same-sex couples earn less than married men.

- Individuals in same-sex couples in Alaska are more likely to work in the private sector: 62% of individuals in same-sex couples work in the private sector, compared to 56% of married individuals; 37% of individuals in same-sex couples work in the public sector, compared to 31% of married individuals; and 1% of individuals in same-sex couples are self-employed, compared to 12% of married individuals.
- Individuals in same-sex couples in Alaska are more likely to have a college degree: 31% of individuals in same-sex couples and 27% of married individuals have earned a college degree.
- Despite the military's historic policies of excluding gay men and lesbians from service, individuals in same-sex couples have served in the military: 5% of individuals in same-sex couples are veterans, compared to 19% of married individuals.

SAME-SEX PARTNERS IN ALASKA DEPEND UPON ONE ANOTHER IN WAYS THAT ARE SIMILAR TO MARRIED COUPLES

- Couples in which one partner does not work or earns significantly less than the other partner may indicate financial interdependence. Almost one in

four same-sex couples (23%) have only one wage earner, compared to about one in three (35%) of married couples.

- A larger percentage of same-sex couples in Alaska have at least one partner who is disabled: 34% of same-sex couples, compared to 23% of married couples.
- 3% of same-sex couples have at least one partner over the age of 65, compared to 9% of married couples.

SAME-SEX HOUSEHOLDS IN ALASKA HAVE SIGNIFICANTLY FEWER ECONOMIC RESOURCES THAN MARRIED HOUSEHOLDS

- The median income of same-sex coupled households in Alaska is \$57,400, less than that of married couples (\$68,600). The average household income of same-sex couples is \$64,449, significantly less than \$78,613 for married couples.

- Same-sex couples are significantly less likely than married couples to own their homes: 55% of same-sex couples in Alaska own their home, compared to 75% of married couples.

SAME-SEX COUPLES ARE RAISING CHILDREN IN ALASKA, YET WITH FEWER ECONOMIC RESOURCES THAN MARRIED PARENTS

- More than 44% of same-sex couples in Alaska are raising children under the age of 18.
- As of 2005, an estimated 1,335 of Alaska's children are living in households headed by same-sex couples.⁷
- In Alaska, married and same-sex couples with children under 18 in the home have, on average, 2 children.
- Roughly 9% of Alaska's adopted children (or 594 children) live with a lesbian or gay parent.⁸

- Same-sex parents have fewer financial resources to support their children than married parents. The median household income of same-sex couples with children is \$57,400, or 13% lower than that of married parents (\$66,200). The average household income of same-sex couples with children is \$71,207, less than \$74,585 for married parents.
- While 61% of same-sex couples with children own a home, a larger percentage of married parents (71%) own a home.

CONCLUSION

Census data provide valuable information about gay and lesbian couples in Alaska. While in many respects Alaska's same-sex couples look like married couples, they—including those with children—have fewer economic resources than married couples to provide for their families and lower rates of home ownership.

	Same-Sex	Married
Race/Ethnicity ⁹		
White	65.7%	77.7% [^]
Black	7.4%	2.7% [^]
Hispanic	4.9%	3.2%
Asian	5.3%	4.5%
American Indian/Alaskan Native	12.0%	9.3%
Other	4.7%	2.7%
Average age	37.3	43.9*
Percent with a college degree or better	31.3%	27.1%

Nome Census Area	7	0.26%
North Slope Borough	14	0.66%
Northwest Arctic Borough	10	0.56%
Prince of Wales-Outer Ketchikan Census Area	13	0.57%
Sitka City and Borough	11	0.34%
Skagway-Hoonah-Angoon Census Area	8	0.58%
Southeast Fairbanks Census Area	15	0.71%
Valdez-Cordova Census Area	21	0.54%
Wade Hampton Census Area	11	0.69%
Wrangell-Petersburg Census Area	10	0.39%
Yakutat City and Borough	1	0.38%
Yukon-Koyukuk Census Area	13	0.56%

About the Authors

Adam P. Romero is Public Policy Fellow at the Williams Institute, UCLA School of Law. J.D. Yale Law School; A.B., *summa cum laude*, Cornell University. His current research examines the significance of family in society and law, especially as relevant to disabled adults without family.

Amanda K. Baumle is Public Policy Fellow at the Williams Institute, UCLA School of Law as well as Assistant Professor of Sociology at the University of Houston. Ph.D Texas A&M; J.D. University of Texas. She specializes in demography, social inequality, and the sociology of law.

M.V. Lee Badgett is Research Director at The Williams Institute, UCLA School of Law, and Director of the Center for Public Policy and Administration at the University of Massachusetts Amherst, where she is also on the faculty of the Department of Economics. She studies family policy and employment discrimination related to sexual orientation.

Gary J. Gates is Senior Research Fellow at The Williams Institute, UCLA School of Law. He studies the demographic and economic characteristics of the lesbian and gay population.

¹ Unless otherwise noted, we calculate the demographic characteristics from the Census 2000 Public Use Microdata Sample (5% file) available from the U.S. Census Bureau. For a detailed discussion of the Census 2000 methodology used in this report, see *Census Snapshot: Methods Note*, available at <http://www.law.ucla.edu/williamsinstitute/publications/MethodologicalDetailsForCensusSnapshots.pdf>. In estimating numbers of same-sex couples and children raised by same-sex couples, however, we use the total number of same-sex couples from 2005 and the proportion of couples with children from 2000 in order to provide a more up-to-date estimate.

² Tavia Simmons & Martin O'Connell, U.S. Department of Commerce, U.S. Census Bureau, *Married-Couple and Unmarried-Partner Households*, Census 2000 Special Reports, CENSR-5, p. 4, tab. 2 (Feb. 2003).

³ Gary J. Gates, The Williams Institute, *Same-sex Couples and the Gay, Lesbian, Bisexual Population: New Estimates from the American Community Survey*, p. 11, apx. 1, available at <http://www.law.ucla.edu/williamsinstitute/publications/SameSexCouplesandGLBpopACS.pdf>. Sample sizes for individual states in 2005 are not sufficiently large for the analyses presented in this report, we therefore use data from Census 2000 where samples are on average five times larger than 2005.
